

Exam Strategy

Higher Level: Test is 2 hours (**120 mins**) long

You are asked to answer **Q1, Sections A & B** and **any 3** other questions

Q1 Section B is compulsory and is entirely on the **project** you have done

So choose **4 topics** to from **Q2 to Q7** (one of these is a backup question)

That gives you **24 mins per question** (say 4 mins to read & 20 mins to write)

If you have time at the end of the test do **one** extra question only

Ordinary Level: Test is 1.5 hours (**90 mins**) long

You are asked to answer **Q1, Sections A & B** and **any 3** other questions

Q4 is entirely on the project you have done (it is **not** compulsory)

Answer as many questions carefully as you can in the 90 mins

If you attempt all the questions you will have **18 mins per question**

That's more than enough time if you spend 3 mins reading the question and 15 mins writing
